

Introducing the **Red Hat** **Developer Program**

RED HAT
DEVELOPERS

redhat.

**We're all software
companies**

**And Most Companies
will become...
Software Companies**

Why?

The traditional value chain is becoming a commodity

**Technology spending is shifting
from TCO to ROI**

The economy is increasingly software
centric

**and good developers and
developer operations are now
a strategic necessity for all
companies.**

**You are the most valuable asset
to the modern economy**

And it's our job to make you successful

We are Red Hat.

We are Open Source.

Open Source is about Freedom

Freedom to change,
to improve, to choose.

And choice is Good.

Mostly.

The burden of choice

The struggle is real.

Top Picks for Andrew Lee

**Simplicity is the
ultimate sophistication.**

- Leonardo da Vinci

We get it.

Software is complex.

And we are...

Andrew Lee Rubinger, Program Manager

Engineering background in hiding
complexity

Ray Ploski, Director of Developer Strategy

Spent years matchmaking enterprise
customers with tech

Harry Mower, Senior Director of Developer Programs

Delivered programs helping engineers get started and on their way for the past decade

Red Hat is for your employer

Support and SLAs,
stability and reliability

**But the Red Hat
Developer Program
is for YOU**

Mission statement

Empower and enable Enterprise Developers of Red Hat technologies by providing powerful tools, support and thought leadership so they can solve the toughest business challenges efficiently and enjoyably.

**This is a community.
This is a conversation.**

And we're here to facilitate.

**So there are a few things
we can do for you**

Try it.

Get your hands on the software you need.
Quickly.

Buy it.

Put you in touch with world-class services
and support.

Make it better.

Resources built by us, by you, and others
around the world working on the same
problems.
